

DOCUMENT APPROVAL SYSTEM

- Adopting AV1 for real-time communication at Meta has been a multi-year effort spanning codec selection, device eligibility, rate control, and error resilience.
- We're sharing the technical and operational challenges while deploying AV1 and expanding coverage, and how we addressed them for real-time communication.
- We're presenting several technologies for improving AV1 call quality, including rate control and error resilience.

The AV1 video codec, first standardized by AO
